ABOUT ME

Experienced QA Engineer with deep expertise in functional testing, automation frameworks, API validation, and database testing within high-traffic e-commerce environments. Hands-on experience in writing scalable automation scripts, analyzing business requirements and enhancing QA processes. Strong understanding of system architecture, order flows, product lifecycle, and third-party integrations.

SKILLS

Automation: Selenium Java, Cucumber BDD, TestNG

Manual Testing: Web, Mobile, Functional, Regression, Smoke

API Testing: Postman, Burp Suite, Chrome DevTool

Databases: MySQL, SQL Queries

Tools: Jira, Azure DevOps, Git, Postman, k9s, Burp Suite

Search & Integrations: Solr, Algolia, Clickpost, Freshdesk, MoEngage, Limechat

Methodologies: Agile Scrum, SDLC, STLC

PROFESSIONAL EXPERIENCE

Quality Analyst – Aza Fashions (Mumbai)

Jan 2023 – Present | E-Commerce (Luxury Fashion)

- Developed & maintained automated test scripts using Selenium + Java in a Cucumber BDD framework to enhance test coverage and reduce manual effort.
- Built reusable step definitions and modular functions for scalable automation.
- Performed API testing across internal & third-party services to validate integrations, data flow, and performance.
- Implemented **API Automation with RestAssured** to speed up integration testing cycles.
- Used SQL queries to validate backend transactions, inventory logic, discount/price rules, and order workflows.
- Executed E2E manual testing on web & mobile (Android/iOS), ensuring seamless user experience across checkout, payments, wishlist, search, and product listing pages.
- Tested search platforms including **Solr & Algolia**, validating sorting, filter accuracy, relevance, and indexing.
- Worked on 3rd-party platform integrations such as **Clickpost (logistics)**, **Freshdesk (support)**, **MoEngage (marketing automation)**, **Trustpilot**, **Limechat**, **Gupshup**, **Neuralens**, verifying data sync and workflow automation.
- Performed cross-browser testing (Chrome, Firefox, Safari) and responsive design testing for consistent UI/UX.
- Participated in Agile ceremonies – sprint planning, daily stand-ups, backlog grooming, and retrospectives.
- Collaborated closely with developers & product managers to clarify requirements, improve test coverage, and ensure timely delivery.

KEY ACHIEVEMENTS

- Automated key user journeys, reducing regression test execution time by **30%**.
- Improved defect detection rate by enhancing test scenarios, data coverage, and boundary validations.
- Designed & executed Behavior-Driven Development (BDD) test cases using Cucumber & Selenium.
- Introduced structured test reporting & dashboards for better release quality visibility.
- Contributed to early identification of production-critical issues by adopting shift-left testing.

CORE COMPETENCIES

- Automation Architecture (Selenium + Java + Cucumber BDD)
- API Testing
- SQL Data Validation
- Regression Optimization

- Defect Root Cause Analysis
- Agile QA Practices

EXPANDED RESPONSIBILITIES

- Designed automation test suites covering login, checkout, payments, coupons, gift cards, and order lifecycle.
- Analyzed logs (Kubernetes pods using k9s) to validate request failures and backend behavior.
- Performed security validations using Burp Suite for high-risk user journeys.
- Created structured test documents: Test Plans, Test Scenarios, RTM, Sprint Reports.
- Coordinated closely with Dev & Product teams to identify gaps in requirements and solution implementability.
- Supported production release testing, hotfix validation, and ticket RCA.

EDUCATION

Babasaheb Naik Engineering College, Pusad, Maharashtra
Bachelor of Engineering - CGPA 9.19

Jul, 2017 – June, 2021
